Don't recommend without VR-headset.. Some cool looking things for Batman and Robin.

Costumes such as black lantern and old school TV shows

thumps up, great stuff. 5 out of 10. i tride to play on my new computer and i cant evin move. Solid product, and great deal at today's prices. Plenty of detail and character, if lacking in traffic in QD (but to be expected at this age). Recommendend wholeheartedly.. Well, I'm currently stuck but I think it is definitely something that I am doing! LOL To be fair, I'm still very early in the game. There are A LOT of indie \/ action \/ platformers on Steam all calling out for your money but I would give this one an EASY reccomendation. Controls are tight (and they have to be in this genre) game difficulty is fair, and the graphics are purty. Would have paid more tbqh.

A-

I've often found myself enjoying these kinds of games; Stanley Parable, Gone Home, Proteus, Kario and even 9.03m was somewhat enjoyable. However this, after getting the various endings I have still no idea what the point of this game was. I got nothing out of playing this game exception confusion at the ending, it was a mess and made no sense. It's just a case of here's a *twist* and it then simply ends.

I'm glad it was only £3 but I'm annoyed that the fact this game ushered me into thinking it'd be something good, something to go alongside all those wonderful games I previously mentioned. No, this is a complete waste of time which is laughable at how lackluster and short it is.
. i don't remember it having terrible physics when i was 5. great little series, i wish they continued it, or netflix picked it up or something. what the ♥♥♥♥ is wrong with this game. When creating an RPG, one of the most important things are the characters. While RPG making tools often come with their own standard characters, it can really set a game apart if the game uses custom designed characters. But, for those of us like me who lack the ability to create custom character portraits and character sprites, Game Character Hub is a godsend.

Basically, when you start the tool you create a type of character. Then you pick pieces from the proper character type, select them, and shift their order around, until the character looks right. The character (or face portrait) is shown in the lower left-hand corner, so you can quickly see what your result looks like.

Once you have a character, you can export it to use in the game or save the particular character, so you can re-load and edit it later. This is a huge help, in case the character doesn't look exactly right, or if you want to make a similar character later.

And, what if you want a slew of similar characters? Say you want a lot of minor NPCs that look just a bit different? Game Character Hub has you covered there. With one special Export command, you can create dozens or hundreds of characters (or faces) which vary in color (such as hair color, eye color, clothing color), all from a single template. This is a great way to fill in the roster of minor NPCs, very quickly.

Overall, it's an invaluable tool for character creation and I highly recommend it.. Great game, cool little puzzles :). Learned that herbivores have a taste for human flesh.
