

Find out the way you can use Dis 44 with the original BMW ECU programming software developed by BMW. Mathew, Bill or inpa/ediabas manual. . I have uninstalled this software and installed the original BMW software and it worked. . Die still just says "BMW" in the EDIABAS menu, that doesn't help me because when I first installed the BMW software I . Jul 27, 2016 I have the original BMW software on my Windows laptop and I have properly set the Progman to the correct mode and been to both the EDIABAS and ECU menus. . SUCCESS FACTOR : You must have an original BMW software and a Progman that has been programmed as a Dis 44 or GT1/44/57/SSS v32. . Jul 28, 2015 DIS v57, part 2 : Lenovo , 2013/2014/2015/2016/2017/2018. How to fix DIS 44 By Brodix in VB If you are still getting the "unknown" message on your DIS 44, follow this video, Q: Multiple GMP versions in a Python 2.7 environment I'm attempting to use gmpy2 python package in my Python 2.7 environment. When attempting to import, I encounter this error: ImportError: No module named gmpy2 Interestingly, if I set my system's gmpy python version as well, I am able to import properly. Also, if I remove my other version of gmpy2, I am able to import properly. However, I have multiple versions of gcc installed on my system, and a parallel python installation, so I'm not clear how I can easily switch my default python gmpy from version 2 to 3. So, given that: 1) I cannot switch my system's gmpy version; 2) I only have one version of gmpy to choose from; What do I have to do to install gmpy3 in Python 2.7? A: First, remove the old version of gmpy2, then install the latest: pip uninstall gmpy2 sudo apt-get install python-gmpy3 Then, from your running python, run: python3.5 -m pip install --upgrade g

Mar 10, 2009 I bought a 32 bit version of INPA back when to be exact, 19th of May 2006 and on April 2006 the software was installed.. Why am I getting this error Message How can I fix this error A: And the answer is DRIVE TEST f678ea9f9e
