About This Game

You can feel immersed in racing where speed is not as important as intelligence and skill. The 180 degree turns in this type of races make the position taken is important and the possibility of displacing the opponent has an advantage. You can run at night and with obstacle course.

Gamepad needed.

No need to explain, you've already lived in the movies this type of races in films like Ben-Hur, but now you will be the protagonist. Enjoy it!

Not recognizing the F chord...FIX YOUR \u2665\u2665\u2665\u2665ING GAME!!!. Another standard Sakura game. Only six choices, a bit over 2 hours of reading time (but I read fast).

Easy way to get a perfect game.

Bought on-sale, not really worth full price, especially when compared to Sakura Fantasy or Sakura Dungeon.. update 04/26/15: they obviously did an update to sparkle 3 this night, because now there are "gems" to find. seems, the graphik bug is fixed. so this game now makes a sense and is nice to play. why no notice about that update? now i can recommend this little program. thumb in the air!

old text and reason for the negative thumb i gave first:

ähem... where are those wonderfull colored items i should see??? this is not funny. i have never had such a bad grafik bug. but it is my fault to by such a "game". real good and playable games are made from real programmers! not recommend!!!. Buy Buy Buy. Looks nice but boring and slow.. A nice step in the right direction. I'm having a great time playing it so far. Improved graphics, physics, and AI from previous generations (I've owned them all since motogp15). I'm happy with my purchase.. I want to be honest from now on...

I just wrote this review to show everyone that I have been the very first person to buy Binaries on Steam.

The original review has been deleted in order to write this here.

As you can see, I don\u00b4t even own the game anymore; I refunded it because it wasn\u00b4t worth its money for me.

I am not trying to say this game is bad, actually it\u00b4s the opposite! I love the mechanic, which makes this as hard as it is. The jokes are... well, let\u00b4s say they could be better. I think 9,99\$ are way too much for this, but "Binaries" is pretty nice and I want at least to support the developers by writing a positive review. I will rebuy this, as soon as it\u00b4s cheaper, promise.

I am sorry about this guys. Just couldn\u00b4t stand it any longer not telling you all I should.. Most important thing to know about this game is that it is NOT PUzzle Quest. If you come into this game expecting something like Puzzle Quest, you will be disappointed. Puzzle Quest is an rpg with a puzzle game as the core of it's combat system. Gryomancer is a puzzle game with a fantasy theme and a few very light rpg items tacked on.

You have skills, but they all work automatically. Make a match (using Bejewled Twist instead of Bejeweled) and both your skill gage and the enemy's fills up. Match your current monster's color to fill a lot fast, match the enemy's to stop it from filling at all. Full gages turn jems into jems that do things when involved in matches if it's your, or timed jewels that go off if you dont' get rid of them if they are the enemies.

That's mostly it. There are also maps to explore and experience levels which change the rate of skill filling and different monsters you can add to your party. The focus is more on the puzzle side with the other stuff flavoring it.

Is is good? Yes, I think it is very good.. Game mechanics are too fast paced, losing the feel of actual play.

Need some work but its brand new and has good potential. But definately give it a little while. worst game ever played just aids its like candy crush but with monsters, wow thats really... would not recomend to any one who likes VIDEO GAMES but if your a facebook "gamer" you will love this. Okayish game, too expensive. I didn't play this game a lot, but I usually really invest time before doing reviews.

Not so much this time, because the Devs ditched this one quite a while ago in a unfinished state full of bugs and balancing issues. The game itself is not bad, it's actually pretty fun but there's quite a few bugs that hold back your characters potential power, making it way too hard in later stages.

TL;DR don't buy.. The concept of game is interesting to me. I very much had liked graphics in game. The graphic engine in game very beautiful. In spite of the fact that game in early access - I very much hope the developer will gradually improve game and whenever possible to bring new characters in game and to finish infrastructure in game.
I want to wish to the developer of good luck!

Концепция игры для меня интересна . Мне очень понравилась графика в игре.Движок в игре очень красивый.Несмотря на то, что игра в раннем доступе я очень надеюсь разработчик будет постепенно совершенствовать игру и по-возможности вносить новых персонажей в игру и дорабатывать инфраструктуру в игре.
Я хочу пожелать разработчику удачи!. Weird game and very short. Imagine what playing under influence would be like. This game gives you exactly this experience :D

It's alright if you buy it for a few cents, just don't expect too much. I think this would be pretty cool as a VR game.. Don't buy it. Unless you are after three easy achievements and one more "Perfect game" on Steam, do noooooot spend any money on this. Even if it's 0.59 euro which I spent in HumbleStore. It has no play value and you would be better of looking through flash games that are free in the interwebz.. This looks like a good game. There's plenty of content and good looking graphics. Player control works quite well and you're set to explore vast bodies of water.

Subjective: ★★★★★

Objective: ★★★★★ — Graphics: ★★★ — Content: ★★★ — Handling: ★★★

<https://www.youtube.com/watch?v=mpFIq83ao14>. Liked the game but if you are in for the steam achievements they were there but never worked I received none despite actually accomplishing many. Game is fun, got stuck a few times by not doing things in just the right order but that makes it interesting and not too easy.. VR short movie worth a watch. It is short. I wish there was hand and arm movement to make it seem like it was more of you involved. There should have been more tension from the girl. In other words more acting from her. Other than that it was free and another VR experience I had not had before. Get it and watch it. It is not really scary but you are the victim. Freaky.

For those who don't have VR here is a link to the video.
